

Trimming Donkeys: Trimming Protocol, Hoof Distortion, and Laminitis – Part 1

Donkeys are a little different than horses when it comes to working on their hooves. In this two-part webinar series, Ross Keller will discuss trimming protocols, hoof distortion and evaluation, laminitis and hoof care strategies for laminitis, and multiple case studies.

Part 1 – Donkey Trimming Protocol Refinements & Hoof Distortion Evaluation

Trimming topics include the following:

Sole plane and frog plane identification

Sole depth assessment

The importance of asking questions (i.e. does the presentation and all data make sense together?)

Adapting your approach for atypical presentations

Use the [converter](#) to find your local time. Visit the [webinar instruction page](#) for more info.

Distortion and evaluation topics include the following:

Defining distortion

How distortion is expressed in donkey hooves

Why understanding and evaluating distortion is important

Explanation of a distortion grading system

Part 2 – Donkey Laminitis and Case Studies

Laminitis topics include the following:

Cumulative damage

ACTH and insulin testing

Short-term hoof care applications

Long-term hoof care strategies

trimming protocols and procedures specific to the donkey and regularly provides corrective and rehabilitative hoof care. In addition to teaching the technical aspects of donkey hoof care, Ross also places significant emphasis on teaching about donkey behavior, behavior modification (gentling), and appropriate handling techniques.

Sign up

Parts 1 and 2 are included in the price. The recording of this webinar may be purchased and viewed for one year as many times as you would like after the live event.

Upon purchase of the webinar, you will receive the zoom link via your invoice. Members can also access the Zoom recording links via their account by logging into the website, clicking on the “Menu” dropdown, and then clicking on “Your Orders”.
